

**Position Title:**

Application Chemist, ZipChip CE-ESI, Boston MA

Company Overview:

908 Devices is developing extraordinary handheld devices for chemical analysis. Founded by a seasoned team with demonstrated successes in delivering breakthrough miniature analytical instruments to the market, and backed by top tier venture capital and government collaborators, we are looking to welcome more high-talent contributors to our team. You'll have the opportunity for spirited collaboration and growth with a company at the forefront of the field.

Position Summary:

Position involves the continual development of Life Sciences ZipChip CE-ESI MS applications, as well as the running of customer evaluation samples. ZipChip CE-ESI connected to the Q Exactive HF Biopharma MS system will be utilized for these studies.

Key Responsibilities:

- ZipChip CE-ESI MS application development, and running of customer evaluation samples for a variety of biotherapeutic, peptide, and small molecule Life Sciences experiments.
- Experience in conducting qualitative, quantitative MS experiments for large/small molecule sample sets
- A working knowledge of Orbitrap mass spectrometer operation
- Hosting customers on-site at 908 Devices for ZipChip CE-MS training purposes
- Participation in ZipChip customer collaborations.
- Potential ZipChip technical contributions at scientific meetings
- Engage with new customers through application development work
- Establish and maintain strong relationships with customers through sound scientific expertise
- Provide excellent customer service by following through with prompt solutions to all customer inquiries.
- Effectively work and communicate with other departments such as technical support, marketing, customer service, and business operations.
- Assist inside sales and field sales representatives in responding to customer needs as they arise.
- Contribute to 908 Devices team and departmental initiatives outside of the day-to-day lab activities.

Qualifications:

- Strong technical knowledge of the Life Sciences CE, LC and MS application areas, especially in the field of biotherapeutics characterization
- Skilled MS operator
- Proficiency in Thermo MS data processing software tools such as Xcalibur, Proteome Discoverer, BioPharmaFinder and Compound Discoverer.

Additional Information:

- The position is based in our 908 Devices, Boston (Seaport) office
- The new hire will report to the 908 Devices Life Sciences Commercial Leader
