

Product Development Director – Scientific Instruments

Pennsylvania

Outstanding opportunity to lead the commercialization of a technology that could revolutionize the analytical chemistry sector! Our client, a well-funded start up based out of PA, are looking for an engineering manager capable of delivering to market a robust and cost-efficient product based on an innovative technology related to Mass Spectrometry and Chromatography.

Primary Responsibilities

- Manage the entire engineering and manufacturing function of a rapidly expanding organization including; budgeting, product road mapping, regulatory compliance & resource management
- Collaborate with the R&D team to transfer prototype instruments into production ready models
- Work with the commercial team to identify application specific product improvements
- Create and manage a multi-disciplined team of engineers to ensure the continued growth and success of the business

Primary Qualifications

- Minimum of a B.S. in an engineering/scientific discipline (further degree a plus) with at least 10 years industry experience developing high complexity scientific instrumentation
- Experience developing Mass Spectrometry or Separations-related instruments a MASSIVE plus!
- This is a **senior** leadership position - prior knowledge developing business strategies from an engineering perspective is essential
- You must have the desire and expertise to manage the commercialization of complex scientific instrumentation independently

Salary / Benefits

- Excellent & equity options
- Excellent healthcare (including full family)
- 401k and paid vacation
